

# McLay Fortress Qld

*Exclusive to Reef Marine, Mackay*

**T**he unique McLay Fortress design allows for a sharper entry permitting a better ride and less spray. Reverse chines allows greater stability with a large deadrise. Floor height is reduced to the bottom of the boat resulting in lower centre of gravity.

Increased floatation is achieved by pressurised buoyancy tanks removing the need to use foam.

As the hull plate is rolled not pressed, metal stress and fatigue in the McLay Fortress models is greatly reduced - this also increases the durability of the hull.

The McLay hull has a buff finish and is coated with Nyalic to seal the aluminium and reduce oxidation.

When you have a look at one of these exceptionally made hulls you will agree the craftsmanship is second to none.

## The Fortress Range

- 4.4m Fortress Dinghy
- 4.8m Fortress Dinghy
- 4.8m Side Console
- 5.0m Side Console

## Fortress Standard Features & Benefits

- 1) Plate construction (extra strong)
- 2) Rolled bottom hull with chines (no stress on material)
- 3) Fully welded checker plate floor
- 4) Longitudinal ribs
- 5) Air buoyancy chamber under floor (no foam)
- 6) Nyalic coated (seals aluminium from corrosion, reflects the heat and easier to keep clean)
- 7) Fully drained front casting deck
- 8) Super quiet ride (no more tinny slap)

- 9) Very dry boat
- 10) Very buoyant hull with no keel (floats in less water than conventional hulls).

## 4.8 Side Console Fortress

Extra Features these boats have include

- Self drain cast deck
- Live bait tank STD (not plumbed)
- Rear casting platforms
- New designed transom
- Fully enclosed transom with four hatches.
- 3 storage compartments
- Top left hatch is the live bait tank
- The transom offers more space and more improved comfort for fishing offshore.

## 5.0m Side Console Fortress

Designed for the serious offshore fisherman and spear fisherman with a transom pod, and boarding platforms on either side with a boarding ladder for access.
